

How to install - Android

## **Crash Recovery System Android installation**

This manual explains how to install the Crash Recovery System on an Android device.

### **Technical specifications / System requirements**

Hardware: All hardware (tablets recommended)  
Android-version: 5.0 and later versions

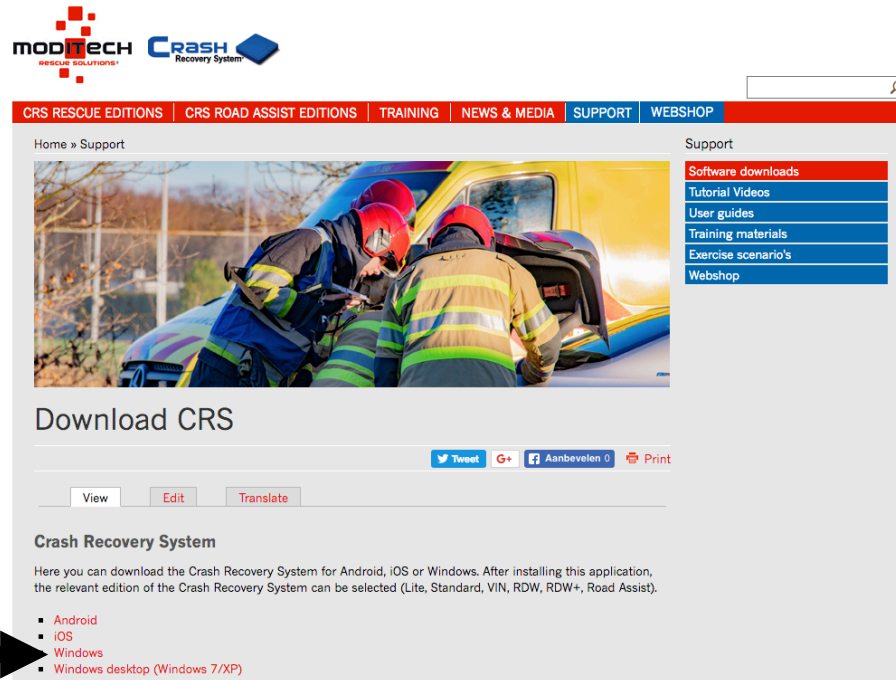

For this installation a Wi-Fi internet connection is required.

## Download CRS

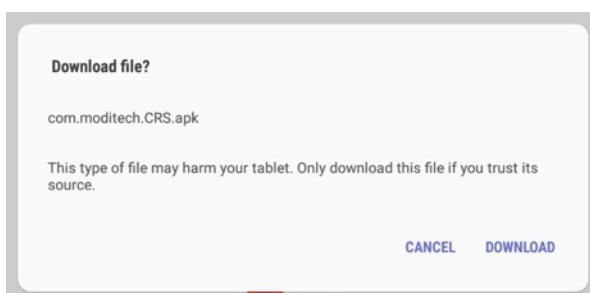

1. Launch a web browser and type [www.moditech.com](http://www.moditech.com).
2. Select the URL [Download CRS](#), as shown below.

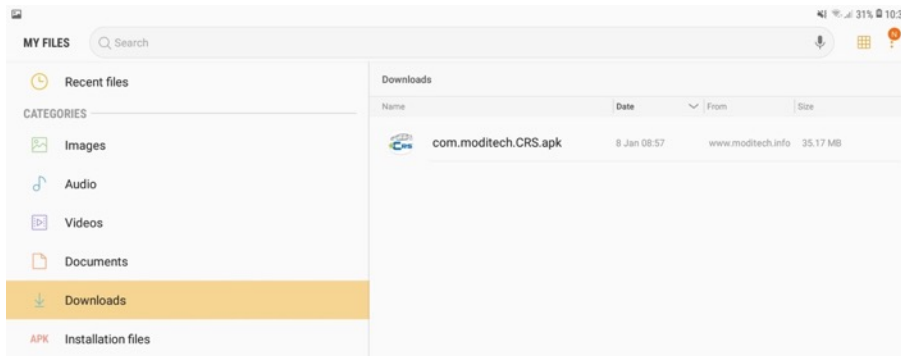

3. A new page appears. Select in this screen the operating system of your device.

4. Click Windows. A new screen appears. Select the URL [Click here to start downloading the Crash Recovery System software](#).
5. A dialog box appears. Click [Download](#).

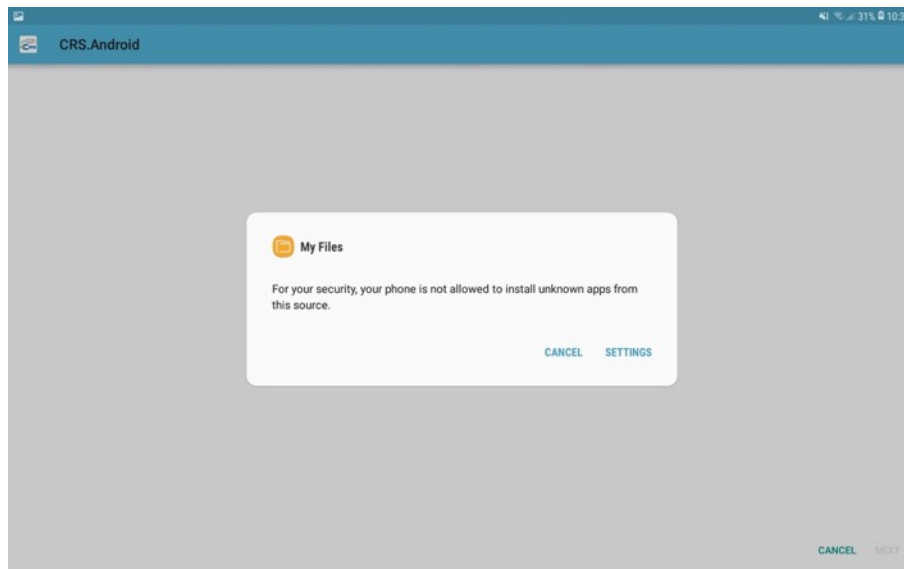

6. Now the file `com.moditech.CRS.apk` is located in the folder [Downloads](#) on your mobile device. Tap this file to start the installation of the CRS.

**Note:** In case your mobile device is not allowed to install unknown apps from this source, the dialog box below appears.

**Note:** In case this dialog box does not appear, jump to **step 7** (next page).

Click [Settings](#).

Go to [Biometrics and security](#) and select [Install unknown apps](#). Allow installing apps from this source. In this case the source is [My Files](#) (see below). After putting the status to “allow” navigate to the folder [Downloads](#) to install the CRS.

**Note:** the used source for installing the CRS could differ from [My Files](#).

7. After downloading the application, select the button [Install](#) to start installing the CRS.

8. The app is installed.

9. Now a CRS-icon is visible on your mobile device. Click this [button](#) to launch the Crash Recovery System.

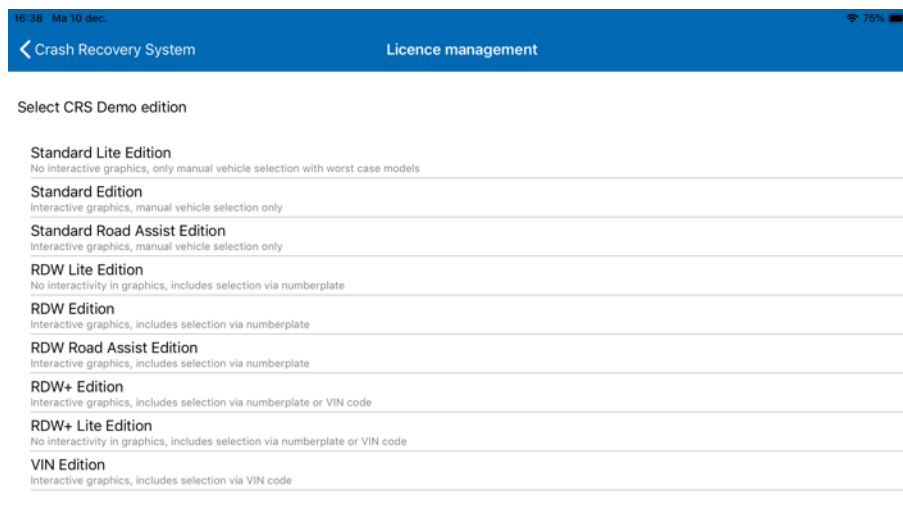

## Select app mode

After launching the software for the first time the activation screen below appears. Here you can select the demo-version or you can activate the CRS with your license code.

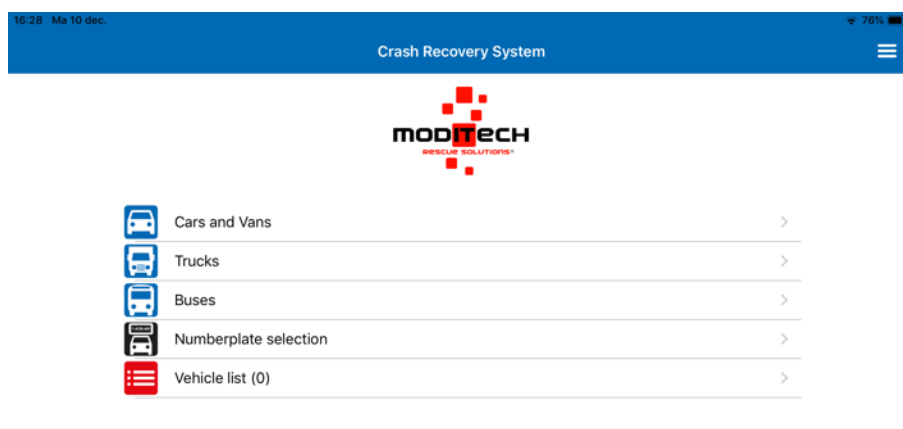

## Select app mode > Demo mode

Select **Demo mode** to see all available CRS Demo editions.

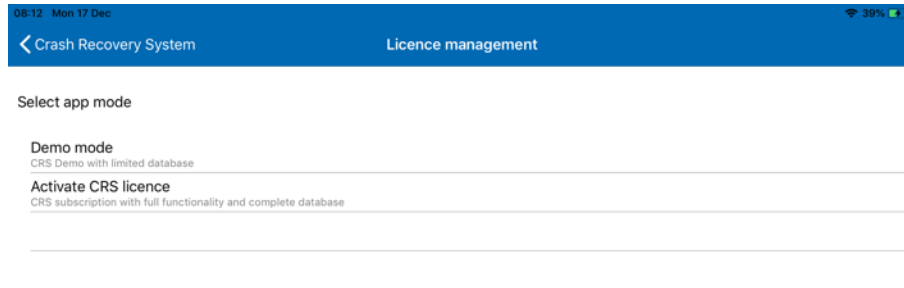

Select a Demo edition and the main screen of the Crash Recovery System appears.

**Note:** The Demo-mode contains a limited database. Please contact [www.moditech.com](http://www.moditech.com) for more information about demo editions.

## Select app mode > **Activate CRS license**

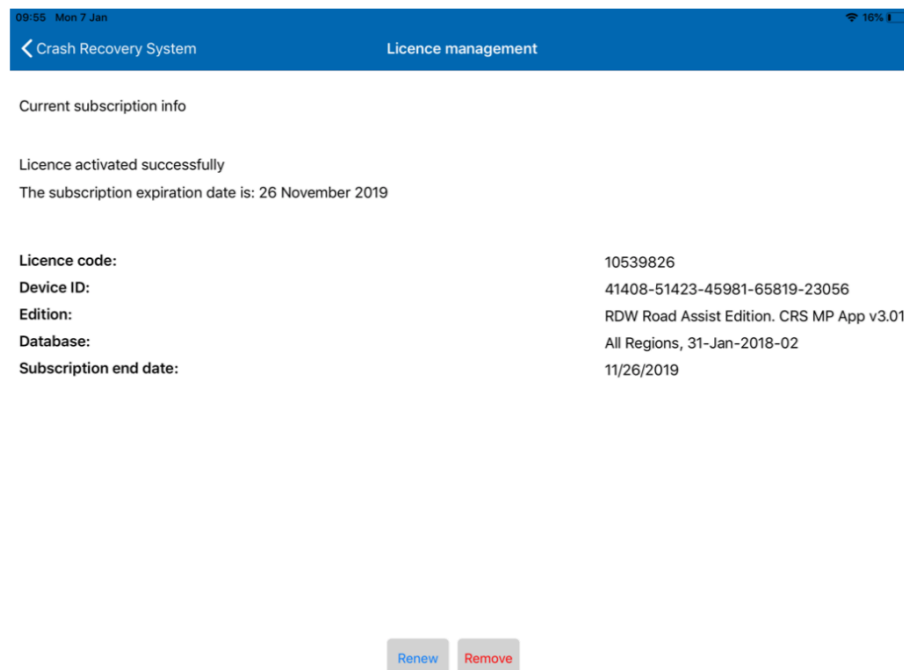

Select [Activate CRS license](#) to enter the license code to activate the Crash Recovery System subscription.

After entering the license code click [Activate](#) and the Crash Recovery System is ready to use.

The message “License activated successfully” appears. Click [Crash Recovery System](#) in the upper left corner to navigate to the opening screen.

## License management > Activating offline

If no internet connection is available during the activation process of the Crash Recovery System, the offline activation menu appears (as shown below).

### Single seat license

Select [Single seat license](#) to activate the Crash Recovery System with a single seat license code. A single seat license is a license code linked to one device. You have received this license code by purchasing the CRS.

### Site license

Select [Site license](#) to activate the Crash Recovery System with a site license. A site license is a single license code for a predefined number of installations (clients). Multiple devices (clients) can use the same license code to use the Crash Recovery System.

## License management > Activating offline > Single seat license

If the user wants to activate the Crash Recovery System with a [Single Seat Licence](#), this screen follows. After entering the licence code, tap [Activate](#).

After entering the correct license code, the screen below follows. Select the desired software edition here. Then contact the Moditech helpdesk to provide the identification number. You will then receive an activation code from Moditech Rescue Solutions B.V. Enter this in and click on [Activate](#). The CRS is activated.

**Note:** Contact your system manager for more information about activating the CRS with a single seat license.

## License management > Activating offline > Site license

If the user wants to activate the Crash Recovery System with a [Site licence](#), this screen follows.

15:45 Di 11 dec. 73%

Current subscription info

Licence activated successfully

The subscription expiration date is: 01 juni 2022

Organisation:	Veiligheidsregio Twente
Device ID:	
Edition:	RDW Edition. CRS MP App v3.02
Database:	All Regions, 22-Nov-2018-01
Subscription end date:	1-6-2022

**Note:** Contact your system manager for more information about activating the CRS with a site license.

## Download database

This paragraph explains how to download the database of the Crash Recovery System.

After activating the CRS, the CRS Database needs to be downloaded.

1. Click **OK** to start downloading the Crash Recovery System database.

**Note:** A Wi-Fi connection is required.

2. In case more updates are available, the dialog box below appears. Click again **OK**.

After downloading all updates, the **Update management** menu appears.

Click in this menu (and in Settings menu) the arrow-button in the upper left corner to navigate to the opening screen.
